Cultivating Humanity amid Social Divisions and Digital Transformation

Tokyo Forum is an international conference series that the University of Tokyo created together with the Chey Institute for Advanced Studies of South Korea in 2019, and has provided a meeting place of people, including, but not limited to, those in academia, government, business, NPOs, from all over the world. This year's forum will bring together the expertise of both technological sciences and social sciences, to explore how humanity can respond to the global problems we face today amid social divisions and digital transformation.

※ From Tokyo Forum 2022

Shaping the Future
